

## **Billing Procedures for Airport Endoscopy Center**

To Our Patients:

You will receive at least two separate statements for your procedure:

1. One statement will be addressed from Airport Endoscopy Center. This bill is a result of the facility fee and takes the place of an outpatient hospital bill. The facility is state licensed and certified by Medicare as an Ambulatory Surgery Center. Your insurance company will be billed separately for these charges. However, during this period, you will continue to receive a statement. Please make arrangements to pay the portion that is not covered by your insurance company as soon as you receive your first statement. Once your insurance company has paid, it will be reflected on your next statement.
2. The other statement will be addressed from your physician. This bill is a result of the professional services provided to you. This is the fee the doctor has charged you for doing the procedure. Your doctor's office will bill your insurance company for these charges. However, during this time period, you will continue to receive a statement. Please make arrangements to pay the portion that is not covered by your insurance company as soon as you receive your first statement. Once your insurance company has paid, it will be reflected on your next statement.
3. If your procedure included biopsies or other specimens you may also receive a separate bill from a laboratory. We have sent your insurance information to the laboratory and they will bill your insurance company for these charges. However, during this time period, you will continue to receive a statement. Please make arrangements to pay the portion that is not covered by your insurance company. Once your insurance company has paid, it will appear on your next statement.
